Professional Summary

Dedicated and efficient software developer with over 5 years of experience in a dynamic tech environment. Skilled in a wide range of programming languages and tools, with a strong focus on designing and deploying scalable applications. Committed to improving code quality and workflow efficiency through innovative solutions and collaborative teamwork.

Experience

- XYZ Tech, Senior Software Developer (Jan 2019 - Present)
 - Led a team of developers in a large-scale project to enhance system security, reducing vulnerabilities by 30%. Implemented new features and optimized existing code, resulting in a 20% increase in application performance.
- ABC Corp, Software Engineer (Aug 2015 - Dec 2018)
 - Developed numerous applications and services using JavaScript and Python. Improved the deployment process using Docker and Kubernetes, which decreased server downtime by 25%.

Education

State University, Master of Science in Computer Science (Graduated: May 2015)

Specialized in software engineering and machine learning. Completed a thesis on data mining techniques for large datasets.

Tech College, Bachelor of Science in Information Technology (Graduated: May 2013)

Graduated with Honors, focusing on web development and database management.

Skills

- JavaScript
- Python
- Java
- SQL
- React
- Node.js
- Docker
- Kubernetes
